

Rhino SafeStow 4[®]

Securing loads safely is important from a health and safety perspective but also to provide the driver peace of mind; with fixing options covering most single and double ladder types. Rhino's ladder restraints remove the need to climb on top of the vehicles to secure the loads.

The latest evolution of our SafeStow product. Making loading and unloading ladders onto light commercial vehicles faster, easier and safer than ever before.

Features:

- Three versions available to carry single, double and extra wide ladders
- Safe loading and unloading in seconds
- Manufactured from highly robust aluminium alloy and stainless steel components
- Fully adjustable gas-assisted lifting
- Available in two lengths: 2.2 metre and 3.1 metre
