

Rhino Aluminum Rack

Rhino's Aluminium Roof Rack is designed to perform.

Carefully planned and constructed, the Aluminium Rack uses highly robust aluminium alloy that's lightweight - up to 25% lighter than, yet just as strong as a steel equivalent - corrosion resistant and durable, whilst its contemporary design enhances the appearance of any commercial vehicle.

Features:

- Quick and easy assembly
- Aerodynamic crosstubes reduce wind noise and drag
- Supplied complete with a full width stainless steel roller, which are quickly attached using 'anti-rattle' composite connections
- Manufactured from anodised aluminium alloy
- Composite connector pieces and end caps ensure a hard-wearing and long life
