

VectaBar™

Vecta Bar is tomorrow's generation aerodynamic aluminium roof bar system for today's most discerning van user. Developed and manufactured in Britain using the very latest technological advances in design, it successfully delivers the very best in strength, durability and aesthetics. Supplied, as standard, with FREE cam-buckle strap friendly, fully adjustable load stops this bar system represents unbelievable value. "Load.Lock.Go" ... it's that simple!

Features:

- 'Vecta Bars' are made from superior anodised aluminium (Grade 6082) so won't corrode.
- Lightweight yet very, very strong at only 2 ½ kgs per bar (inc both legs & fixings).
- Supplied with four FREE fully adjustable load stops per roof bar system which can be used in conjunction with Hubb Systems branded 25mm cam-buckle straps (bought separately).
- Roof bar profile has clever T-Track system allowing the use of our load stops, eye bolts, beacon brackets and other accessories.
- Designed and Made in Britain.
- Crash tested to 20g at Horiba-Mira Test Facility (see certification).
- Designed to carry up to 75kgs per bar (distributed evenly and subject to 'Vehicle Handbook' guidelines).
- Will readily accommodate 8ft x 4ft boards.
- Extremely quick to fit, taking around 5 minutes per bar, as an ideal "time is money" solution.
- Compatible with all manufacturer's ladder clamps.
- Spare parts are readily available during the lifetime of this product.
- Cross member dimensions (mm): 1.3m-1.8m long (depending on vehicle) x 59mm wide x 30mm deep.
