

LoadLite™

The Hubb Systems Load Lite™ is one of the most innovative and ergonomic ladder loading systems available in today's marketplace, designed to maximise safety and provide you with the easiest possible access to your ladders. Manufactured from lightweight, highly robust aluminium alloy and complimented by stainless steel parts it boasts one of the biggest carrying capacities available. Safety and functionality at an affordable price!

Features:

- Manufactured from lightweight, extremely robust aluminium extrusion (Grade 6082) that won't corrode and is complimented by the highest quality components.
- Load or unload ladders safely in seconds from ground level rather than climbing onto your vehicle.
- Available in two versions to transport single or double sets of ladders.
- Fully adjustable to accommodate most ladder types.
- Two lengths to choose from to suit; 2.5 metres or 3.0 metres.
- 20g crash tested at Horiba-Mira Testing Facility (see certification).
- "Click into place" orange release catches to help ensure that the system is securely locked into place before the vehicle pulls away.
- Supplied with orange Hubb Systems branded 25mm cam-buckle straps to secure ladders into place, which have been tested to a 300kg load capacity (see Certificate of Conformity).
- Designed and manufactured in Britain.
- System will accommodate up to 2 padlocks (not supplied) to help restrict potential theft.
- This product has undergone rigorous testing to ensure product longevity and the maximum possible safety.
- Individually numbered with identity plaque to ensure full traceability.
