

VectaRoll™

The Vecta Roll rear roller system attaches to the rear most roof bar, offering the user a convenient and safer way of loading or unloading, whilst also protecting the rear of the vehicle. It's novel 'wrap around' design ensures that it's fitted in the quickest time possible

Features:

- Contemporary design which is not only pleasing to the eye but also fully functional
- 35mm diameter stainless steel vehicle specific roller bar offering strength (up to 50kgs) and excellent anti-corrosion properties.
- Roller arm has clever "wrap around" system which fits snugly to the rear roof bar for the quickest possible fitment & maximum stability.
- Phosphated steel roller arms which have been black powder-coated for maximum weather protection.
- Supplied with M10 adjustable support feet to allow for the optimum positioning.
- Roller arm supports also supplied with plastic foot pads.
- Designed and Made in Britain.
- Quick to fit, taking around 5-10 minutes depending on vehicle type.
- Only the best possible fixings supplied with this product using UK suppliers
